

MEHEDI HASAN SHUVO

+8801607242482 | Dhaka, Bangladesh | shuvo.rpm@gmail.com | [GitHub](#) | [LinkedIn](#)

Summary

Experienced Software Engineer with 5 years' experience and a versatile skill set encompassing PHP, Node.js, JavaScript, MySQL, Redis, Docker, and OOP. I bring a strong background in crafting innovative solutions in the dynamic telecommunications landscape and ERP systems.

Currently serving as an Augmented Resource at Banglalink Digital Communications Ltd. through Brain Station 23 Ltd., I contribute to the enhancement of digital experiences. Very recently our first journal has been published in the Malaysian Journal of Science with the Title "*A Waiting Time Based Bully Algorithm For Leader Node Selection In Distributed System*".

I look forward to seeing myself as a software architect in the future.

Work Authorization

- Visa Status: Need Sponsorship.

Skills and Technologies

- **Programming languages:** PHP, JavaScript, Dart, C++, C, Java
- **Frameworks and Technologies:** Laravel, Node.js, HTML/HTML5, Bootstrap, CSS, jQuery, JSON, AJAX, XML, Rest API, Flutter
- **Databases:** MySQL, MS SQL Server, Oracle
- **Tools:** Git, VS code, Postman, Argo CD, Bitbucket, GitHub, GitLab
- **Paradigms:** Agile/Scrum development, SOLID, Design Patterns, OOP, Dependency Injection, Test Driven Development, Debugging, Troubleshooting
- **Others:** Linux, Docker, Redis, RabbitMQ
- **Project Management Tools:** Jira, Trello, OpenProject

Education

Bachelor of Science in Computer Science and Engineering

Jan 2015 - Jan 2020

[American International University-Bangladesh](#), Dhaka, Bangladesh

Relevant Courses: Objective Oriented Analysis and Design Pattern, Designing of Data Structures and Algorithms, Artificial Intelligence and Expert Systems, Compiler Design

Work Experiences

Software Engineer

Nov 2022 - Running

[Brain Station 23 Ltd.](#), Dhaka, Bangladesh

Project: [MyBL SupperApp](#), [Banglalink.net](#), [Ryze Bangladesh](#)

- Implement new features and functionalities as per the requirements.
- Design and develop RESTful APIs for the front end.
- Ensure the APIs are secure, scalable and able to handle **3+ million DAU** (MyBL).
- Develop and maintain CMS for the web.
- Collaborate with other team members and stakeholders to ensure timely delivery.
- Troubleshooting and debugging issues arise with the website or its functionality.
- Write clean, maintainable and efficient code.
- Continuously improve the performance and scalability of the project.
- Following best practices for software development and version control.

Software Engineer

Jan 2021 – Oct 2022

[Erp2all.com](#), Dhaka, Bangladesh

- Worked in a dynamic team where we developed a Cloud Based **ERP** Software using Laravel framework

- Took part in requirement analysis, business logic implementation, task estimation and code review process
- Worked on multiple projects alongside the main project
- Managed, integrated, deployed everything on OLS server.

Junior Software Engineer

Ngen It, Dhaka, Bangladesh

Jul 2019 – Nov 2020

- Wrote backend for a real time B2B Platform and developed a messaging service.
- Designed and developed multiple fully functioning web application using PHP (Laravel)
- Implemented multiple payment options, gateways, and responsive product filtering
- Implemented lazy loading, Caching, Elastic search to improve the performance by 30%
- Managed, integrated, deployed everything on Apache server.

Teaching Assistant (TA)

Oct 2019 - Dec 2019

American International University-Bangladesh, Dhaka, Bangladesh

- Taught courses like Design and Analysis of Algorithms, Mobile and wireless Computing
- Assisted the students to find out the bugs in their code and fix them
- Discussed debugging practice and strategies with the students
- Maintained professional relationship with over 90 students
